                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     5 ACPAEQLAQLLGPNTTDASAAASLICGHFAAVDSKFVDTAFAVDNTYLLFSAYLVFSMQL
                                                                                                                                                                                                                                                                                                                                                                       "Three functional transporters for constitutive, diurnally regulated, and starvation-induced uptake of ammonium into Arabidopsis roots."; plant Cell 11:937-948(1999).
-!- FUNCTION: Involved in high affinity ammonium uptake.
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- TISSUE SPECIFICITY: High expression in root.
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    15;

Engels C., Jost W., Frommer W.B.;
"Differential regulation of three functional ammonium transporter genes by nitrogen in root hairs and by light in leaves of tomato.";
Plant J. 21:167-175(2000).
-:- FUNCTION: Involved in high affinity ammonium uptake.
-:- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-:- TISSUE SPECIFICITY: Root hairs and leaves.
-:- INDUCTION: By nitrogen deficiency.
-:- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)

Sequence features of Arabidopsis thaliana chromosome 3. II.
Tand BAC clones.";
DNA Res. 7:217-221(2000).
-!- FUNCTION: Involved in high affinity ammonium uptake.
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- INSUE SPECIFICITY: High expression in root.
-!- INDUCTION: Highest expression at the end of the light period.
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          6 CPAEQLAQLIGPNTTDASAASLICGHFAAVDSKFVDTAFAVDNTYLLFSAYLVFSWQLG
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                WASAFK-ITDRLFSTGVIDFAGSGVVHMVGGIAGLWGALIEGPRMGRFDHAGRAVALRGH

                                                                                                                                                                                                                          Nature 402:769-777(1999).
-!- FUNCTION: Involved in high affinity ammonium uptake.
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               DB 1; Length 504;

Engels C., Jost W., Frommer W.B.;
"Differential regulation of three functional ammonium transporter genes by nitrogen in root hairs and by light in leaves of tomato."; Plant J. 21:167-175(2000).
-: FUNCTION: Involved in high affinity ammonium uptake.
-: SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-: TISSUE SPECIFICITY: Root hairs and leaves.
-: INDUCTION: By nitrogen. Highest expression after onset of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          light.
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          nodified and nodified and entities required or send an email to live or send an email to live or send an email to live or send an email to live or send an email to live or send an email to live or send an email to live or send or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason or reason

Science 302:842-846(2003).
-!- FUNCTION: Involved in high affinity ammonium uptake.
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- TISSUE SPECIFICITY: High expression in root.
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               PEAM; PF00909; Ammonium transp; 1.

-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- TISSUE SPECIFICITY: Leaves.
-!- INDUCTION: Highest expression in darkness.
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49) family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Query Match 60.3%; Score 1591; DB 1; Length 460; Best Local Similarity 67.2%; Pred.                                                                                                                                                                                                                                                                 Submitted (APR-1996) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Involved in the uptake of ammonia (Probable).
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Length 534;

                                                                                                                                                                  Durbin R.;
Submitted (DEC-2002) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Involved in the uptake of ammonia (Probable).
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 79;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Ouery Match 22.0%; Score 579.5; DB 1; Length 687; Best Local Similarity 31.8%; Pred. Natl. Acad. Sci. U.S.A. 100:7877-7882(2003).
-!- FUNCTION: Involved in the uptake of ammonia (Probable).
-!- SUBCELLULAR LOCATION: Integral membrane protein (Potential).
-!- SIMILARITY: Belongs to the ammonium transporter (TC 2.A.49)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  72;
